

SW 6th St Resurfacing (Depot Ave to SW 16th Ave)

CITY COMMISSION DISTRICT I

The road reconfiguration was completed as part of the resurfacing project, enhancing overall safety and access by improving sidewalks, bringing ADA curb ramps into compliance with current standards, adding on-street parking, raised islands, a new signalized midblock crosswalk, and dedicated bicycle lanes. The safety upgrades also included turn lanes at the PK Young driveway to reduce road blockages during school pick-up/drop-off times, enhancing the corridor for all users and reducing impacts to surrounding neighbors.

Completion: Jun 2026

Estimated Cost: 1,104,861
