

WALDO RD and NE 3rd AVE

CITY COMMISSION DISTRICTS I AND IV

The City of Gainesville and FDOT will focus on connecting infrastructure gaps to enhance pedestrian and bicycle infrastructure. Crossing marks will be added, pavement markings will be enhanced, and pedestrian-friendly features will be incorporated to ensure safety and convenience for all road users. By addressing gaps in bike boulevard infrastructure, the aim is to create a continuous and efficient network for cyclists. This project prioritizes providing safer alternatives for everyone, particularly in historically disadvantaged communities. The comprehensive approach to urban design will foster a more sustainable, connected, and inclusive environment for all residents.

Estimated Completion: 2025/2026
